Kishiwada Castle

The castle tower of Kishiwada Castle was built by Koide Hidemasa, an uncle of Toyotomi Hideyoshi (one of the most renowned warriors in Japanese history), and completed in 1597. A variety of piling methods can be observed in the existing stone walls and moats, which indicates that some of the stone walls are quite old. Kishiwada Castle Garden, "Hachijin no Niwa," is also designated as a National Place of Scenic Beauty. From the observation area on the third floor, you can enjoy a beautiful view of Osaka Bay.

Tako Jizo Engi Emaki

It is said that when Kishiwada Castle was under attack by an enemy and was in danger of falling, an incarnation of Jizo (a physical appearance of him) appeared riding on an octopus and protected Kishiwada Castle with many other octopuses.
